GENERAL FIGHTING.

BOSNIA FIERCE ENGAGEMENTS.

POWERS' WEAK ADVICE.

Green's Note to the Powers accuses Bulgaria of attacking her with a view to securing the possession of the disputed territories pending the result of the Car's settlement of the differences between the warring allies. The note adds that the Greek troops will be sent until the disputed territories have been evacuated by the Bulgarians. Serbia and Bulgaria have addressed Notes to the Powers from their respective capitals. The Powers give all three states to avoid bloodshed, and to resort to arbitration.

BULGARIAN NOTE.

SOFIA, July 3. Bulgaria has presented a strong Note to Greece in which she says that, despite Bulgaria having ordered her troops to cease fighting, the Serbians advanced on the Bulgarian front. The Note insists on Serbia restraining her troops within 24 hours, otherwise she will be held responsible for any bloodshed that may result from the Serb advance.

BULGARIANS V. SERBIANS.

BLOODY FIGHTING. BELGRADE, July 3. It is semi-officially announced that 100 Bulgarian battalions took the offensive on the Serbian front. The Bulgarians have been repulsed, and the Serbians delivered a crushing counter-attack. The whole Serbian force engaged did not exceed 10 battalions with 80 guns. The Serbians eventually gained the upper hand, and the Bulgarians were driven right through that town—winning heavy losses all the while—and back in the direction of Orlovgrad.

MESSAGE FROM KING CONSTANTINE.

LONDON, July 3. King Constantine, in a message to the "Daily Mail," states that the Bulgarian campaign at Salonika on Sunday indicated that he was about to leave the town. This indicated the intentions of the Bulgarian staff which had designed to keep inactive in Salonika as long as possible an entire division of the Bulgarian army. The Bulgarians, moreover, clearly showed their intention to disregard their solemn engagements, and to create by a series of consecutive unexpected strokes, a situation enabling them to paralyse the Greek army. The latter, however, was not to be deceived, and the Bulgarians were repulsed.

ON THE DEFENSIVE.

LONDON, July 3. Both Bulgaria and Serbia claim that their respective armies are acting strictly on the defensive. Nevertheless a report is to hand that a Serbian army has crossed the Bulgarian frontier, and is marching on Sofia, via Tarnobrod. The Vienna correspondent of the "Times" states that the Bulgarians are strongly optimistic, and are in no wise disturbed at the prospect of a hostile combination of all their neighbours against them.

A TURKISH COMPLAINT.

CONSTANTINOPLE, July 3. The Porte, through Russia, has drawn the attention of Bulgaria to the fact that Rodosto and the Bulgarian frontier are still occupied by the Bulgarians, and has requested a speedy withdrawal. The Vienna correspondent of the "Times" states that the Bulgarians are strongly optimistic, and are in no wise disturbed at the prospect of a hostile combination of all their neighbours against them.

ROUMANIA'S GAIN.

LONDON, July 3. The Vienna correspondent of the "Times" states that the Bulgarians are strongly optimistic, and are in no wise disturbed at the prospect of a hostile combination of all their neighbours against them.

EIGHTY ENGINES.

ORDERS FOR BRITISH FIRMS.

TO COST £187,000.

The State Government has placed an order with the Glasgow firm, the North British Locomotive Company, Limited, for 50 class "T" locomotives, to cost about £187,000 each, the total being £9,350,000.

This is not the first contract price, but represents the cost of the engines landed in Sydney and re-exported ready for use.

The first four engines are, under the terms of the contract, to be shipped within a fortnight, and the remainder at the rate of six per month. Mr. J. G. Gilbert Lodge, the firm's Sydney representative, has been negotiating with the Commissioner of Railways (Mr. Johnston) since the Cabinet sanctioned the order, and matters were brought to finality yesterday.

The Government is also placing an order for 20 class "T" locomotives with Messrs. Beyer, Peacock, and Co., of Manchester. These engines will probably cost about £2500 each, and the class are the heavy goods engines, and the type used for suburban traffic.

The Chief Commissioner hoped to have the 50 engines ready for the harvest in February next. Only one-eighth of the total order will have been received at the end of February. The "T" class locomotives should come to hand in January, and six more by the end of February. It is unlikely that any of the "T" class will reach New South Wales before April next. Both the North British Company and Beyer, Peacock, and Co. have been rushed with orders from other sources, and it is said to be utterly impossible to deliver the engines to the New South Wales Government any sooner than the dates already mentioned.

According to a statement made by the Treasurer (Mr. Conn) at the time Mr. Johnston's application for the order was received by the Government, the Evelyns works are not capable of placing more than 20 new locomotives on the line each year. The Clyde works have not been able to supply more than 10, Mr. Conn anticipated. The Treasurer contends that the resources and machinery at Evelyns have been too much occupied in dealing with repairs and alterations to build new locomotives. The Government, however, is not prepared to place more than 20 new locomotives on the line each year. The Clyde works have not been able to supply more than 10, Mr. Conn anticipated.
